

RISHI RAJ SHARMA

AI & Product Development Engineer

+91 6362987264

rishisharma21950@gmail.com

BITM, Ballari, Karnataka

SUMMARY

AI & Product Development Engineer experienced in machine learning and full-stack development. Skilled in Python, Java, TensorFlow, Spring Boot, and building scalable, data-driven applications. Strong problem-solving abilities with a focus on developing efficient, intelligent, and product-oriented solutions.

EDUCATION

Ballari Institute Of Technology And Management

Bachelor In Engineering (B.E.)

CSE - AI Engineering

2023 - 2027

Jindal Vidya Mandir

Intermediate

Physics, Chemistry, Mathematics,
Computer Science

2021 - 2023

SKILLS

- Programming: Python, SQL, Java, C++, Javascript
- Concepts: OOPS, DSA, Machine Learning, ANN, CNN, Cloud Computing, Microservices Architecture, Software Testing
- Web Development & Databases : Django, Spring Boot, HTML, CSS, MongoDB, PostgreSQL
- Tools & Libraries: NumPy, Scikit-Learn, OpenCV, TensorFlow, JMeter, JUnit
- Other Skills: Problem Solving, Debugging, Product Thinking, Requirement Analysis

TRAINING AND CERTIFICATIONS

- AWS Certified Cloud Practitioner
June-2026
- JPMorgan Chase & Co. Software Engineering
Job Simulation June-2026
- AWS Academy - Generative AI Foundations
Mar-2026

PROJECTS

Comments Sentiment Analysis & Summarizer - NEWSROOM AI

Tech Stack: Python, FastAPI, MongoDB, NLP (Transformers, Sentence-Transformers), Google APIs

- Developed an AI-powered system to analyze user comments using the j-hartmann/emotion-english-distilroberta-base model for accurate emotion-based sentiment classification.
- Implemented automated news summarization using Google GenAI (Gemini API) to generate concise and meaningful insights from articles.
- Designed scalable backend services using FastAPI and integrated multiple APIs (YouTube, News API) for real-time data collection and processing.
- Utilized MongoDB for efficient storage and retrieval of comments, sentiment data, and summarized outputs in a scalable system.

CNN-Based Media Player

Tech Stack: Python, Machine Learning, Neural Networks, Streamlit

- Built a media player integrating Convolutional Neural Network (CNN) based gesture recognition for media control.
- Trained and tested the CNN model to detect hand gestures, achieving reliable accuracy for real-time control.
- Combined ML model integration with media-player logic to create seamless end-to-end functionality.
- Gained hands-on experience in ML model development, training, inference and integration in a product-like tool.

Extra-Curricular & Leadership Activities

- Infosys Finacle Certification Training - Edgeverve(Infosys) 2026 - Completed training in PostgreSQL, Spring Framework, Junit & Jmeter . Currently pursuing Javascript training as part of the program.
- Participated in VISAI 2026 - 16th International Project Competition, presenting an AI-based project on sentiment analysis and news comment classification in a hackathon setting.
- NCC (National Cadet Corps): Completed NCC 'B' Certificate; participated in CATC camp and group coordination activities.
